Dentistry from the Heart, February 22, 2013

Dr. Sterling Case and the Sterling Dentistry staff set aside the 22nd of last month to launch their very own Sterling Dentistry from the Heart.

The team sought out assistance from the community's service providers so that they could further help those in the community seeking optimum dental health. The staff provided complimentary treatments to those who are facing unfortunate situations.

We thank our business neighbours, Traditional Bakery, La Cakery, Edible Arrangements, and Tim Hortons for the wonderful donations.

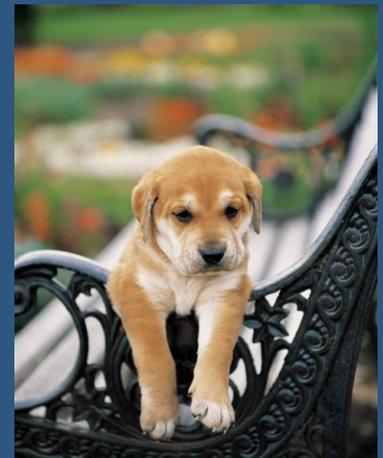

In the end, not only was the event successful, but gratifying and fun for all.

We are pleased that our new friends have gained not only optimal dental care, but can smile with confidence.

**A healthy
Smile....
.....Priceless!**

Did you Know?

Did you know that if you skip brushing your teeth just one day, plaque – the bacterial film on your teeth that forms after eating and drinking – begins to harden into tartar, which cannot be removed by simply brushing your teeth?

So, try not to skip brushing and flossing. Taking just a few minutes each day for your oral health routine and being mindful of healthy snacking options are good ways to prevent oral health complications.

Did you know that popular sweetened beverages such as sports and energy drinks can wear away the enamel on your teeth – your teeth's protective shell-making them more sensitive?

Consider using a straw to limit exposure on your teeth and do not sip the drinks slowly over a long period of time.
